MEASUREMENT

Chilly water

U14

You will need

thermometer (you may need to borrow one from school so check first)
indoor and outdoor taps
pen and paper
ruler

What to do

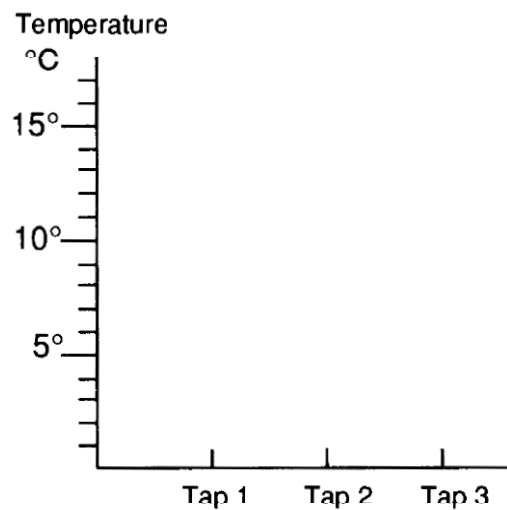

You are to find which tap at your house has the coldest water.

Record your results.

A graph would be a good way.

Discuss with your family what you found out.

Will your results change as seasons change?

WHERE'S THE MATHS?

Reading a thermometer, recording and reading data.
